THE NEXT GENERATION

CRM 2.0 Compliance

Everything in the learning space, and how to use it — the guides, the reference sheets, the practice drills and the assessments that sign you off.

12 guides · 5 reference sheets · practice + capstone

What CRM 2.0 Compliance is

CRM 2.0 is Dwelly's agent-led compliance flow: the system chases certificates, books works and moves jobs forward on its own, and hands over to you at the decisions that need a human. This learning space in the Hub gets you confident with that model before you own it for your team.

You'll each be the main point of contact for your team on CRM 2.0, so the goal is simple: read the guides, keep the reference sheets to hand, practise on realistic jobs, then pass the checks.

How the space is organised

The content is grouped into three pillars — a 1·2·3 journey from finding your feet to operating like a pro:

Pillar	What it covers
1 Get orientated	How CRM 2.0 works and how to find your way around it.
2 Master the features	The buttons, actions and workflows that get jobs done.
3 Work smarter	Timing, edge cases and the habits of a great operator.

How to use it — the recommended path

- **Read the 12 guides in order.** Each is a 3–6 minute read; the landing page tracks what you've completed and shows a progress ring per pillar.
- **Keep the reference sheets open** while you work a real job — the glossary, cheatsheet, price list, FAQ and what's-new. They don't count towards progress.
- **Practise with the scenario drills** — realistic jobs, decision by decision, with instant feedback. Nothing is scored, so make your mistakes here.
- **Pass the knowledge checks.** Each guide has one, plus the capstone at the end. 80% to pass. Clear them all and your certificate unlocks.

The 12 guides

Your core reading, in order. Roughly 55 minutes end to end — but designed to be taken one guide at a time.

Pillar 1 · Get orientated

#	Guide	What you'll learn	Min
01	**How CRM 2.0 works: the agent & you**	The agent-first model — what runs automatically, and the decisions that are always yours.	5
02	**Finding your way around**	The requests queue, the job screen, and how to read a job at a glance.	5
03	**When the system hands over to you**	The designed human checkpoints, and how long the agent chases before it escalates.	5

Pillar 2 · Master the features

#	Guide	What you'll learn	Min
04	**Buttons & actions**	Send Communication, Add Direct Info, Set Visit Date, Provide Instructions and Take Over — what each is for.	6
05	**Rescheduling**	Reschedule without a manual take-over — and let the system read the dates in your message.	3
06	**Remedial works — required vs optional**	Deciding at Certificate review whether remedials are required for compliance or just recommended.	5
07	**Certificate review**	What to check on every certificate, AI address flags, wrong-property certs, and reading a CP12.	5
08	**EPC — not mandatory mid-tenancy**	Why an EPC differs from an EICR or gas cert, and the wording when a landlord goes quiet.	3
09	**Worked example: a gas safety job, start to finish**	Follow one CP12 through the whole flow — including a remedial branch — to see how the pieces fit.	5

Pillar 3 · Work smarter

#	Guide	What you'll learn	Min
10	**Escalations & timing in practice**	Reading the next-action date, third-party blocks, and the 3-day wait cap.	4
11	**Escalations reference: every trigger & the edge cases**	The exceptions the agent raises outside the happy path — what each means, and the document & email cases.	5
12	**Working across 2.0 and 1.0, and other essentials**	Switching a job to CRM 1.0, vacant-property jobs, and the habits that keep jobs clean.	4

Reference sheets — keep to hand

These live alongside the guides but don't count towards your progress. Open them while you're working a real job.

Sheet	What it's for
Glossary: the language of 2.0	Every stage name and control in one place, so the whole team speaks the same language.
Quick-reference cheatsheet	The “when X, do Y” calls you'll make most often, on one screen. Printable one-pager.
Service price cheat sheet	What each compliance service costs, by agency and provider — answer a landlord's “how much?” straight away.
FAQ & common gotchas	Straight answers to the questions that come up most — certificates, scheduling, cancellations, invoices, help.
What's new in 2.0 (vs 1.0)	The headline changes from the old CRM, so you know what to expect and what's different.

Prove it — practice & assessments

Practice drills

Work realistic jobs decision-by-decision with instant feedback on every call. Nothing is recorded — it's pure practice, so this is the place to test your judgement before the real checks.

Knowledge checks

- **One check per guide** — a short assessment tied to each lesson.
- **80% to pass**, the same bar across the whole space.
- **One attempt, then it locks.** Your score is recorded either way; if you need another go, your manager can grant a retake.
- **Every question shows the reasoning afterwards**, so a check doubles as revision.

The capstone

The final sign-off: 20 scenario questions drawn at random from across every lesson, so you never know which topics will come up. 80% to pass, reshuffled each time, retake as often as you like. Pass it and — with all 12 guides read — your CRM 2.0 Compliance certificate unlocks.

Where to find it: open the Hub, then **CRM 2.0 › Compliance** in the sidebar. Compliance Overview is the landing page above; Compliance Assessments lists every knowledge check and your status on each.

Questions, or want to walk through anything? Ask in the manager channel and we'll happily set up a call.
